

SAVE A LIFE

RESPONDING TO AN OVERDOSE

STIMULATION

Yell their name or shout: "hey" or "wake up."

Sternum (Chest)
Rub - glide knuckles
up & down sternum
5-10 seconds.

CALL FOR HELP

Call 911 - "Someone
has overdosed" or
"Someone is
unresponsive."

RESCUE BREATHING

Check mouth is empty
and give rescue
breaths.

GIVE NALOXONE

Administer Naloxone - If
they are still
unconscious 2-3 minutes
after first dose, repeat
rescue breaths and
administer naloxone
again.

RECOVERY POSITION

Hand supports head.
Knee bent over other
leg. Chin/head tilted
back. Stay until help
arrives.
